

Joe Dirt's online fireworks store

Kicking Wing's fireworks stand had none of the cool stuff, so Joe started his own store. It only sells the cool stuff! The admin users have a completely different section than the normal users. Normal users can only create an account, browse, order, and interact with their orders/cart(canceling and repeating orders). The admin can edit products, edit users, cancel orders and add other admin(and regular) users.
